DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-17 are rejected under 35 U.S.C. 102(e) as being anticipated by Shluzas et al. (US Patent 7,179,225). Shluzas et al. disclose a minimally invasive surgical method including the steps of forming an incision through the skin to the spinal columns and introducing a guidewire to aid in accessing the spinal area (Col. 53, lines 1-20), identifying the muscle plane (inherent in the decision of the surgeon), introducing a blunt tip tool (herein this reference as a retractor, and interpreted as that which aids in providing access separating the muscles). Shluzas also discloses an apparatus that has an access tube allowing a guidewire to pass through, extending the length of the tube, and also the step of implanting a spinal anchor (Col. 29, lines 20-55) to an area of the vertebrae (see also Col. 14, lines 1-5 and Fig. 234a).

Response to Arguments

Applicant's arguments filed 7/25/2007 have been fully considered but they are not persuasive. With regards to the arguments directed to the step of identifying a muscle plan, it is noted that Shluzas discloses the step of making the incision and inserting the guidewire. In order to perform this step, some regard to a muscle plane must be addressed by the surgeon to determine the location of the incision. It is further noted that the tool noted in the rejection above may be considered a blunt end to aid in the novelty of the device having the tool to separate muscles. Alternatively, the reference has a tool in Fig. 51 and 52 that may also be considered a blunt end tool to access the surgical site.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
